Health & Safety Policy

(Applicable from 30th December, 2020)

as Per Maharashtra Factories Rules 1963 Rules (73- L) Under Sec 7A (3)

HEALTH & SAFETY POLICY

R-Safety-8.2.2-40

Organizational Set Up for Implementing Safety & Health Policy

The safety and health of our employees are company's most important business consideration. No employee will be required to do a job that they consider it unsafe. The Company will comply with all applicable workplace safety and health requirements and maintain occupational safety and health standards that equal or exceed the best practices in the Industry.

The Company will establish a Safety Committee, consisting of management and workmen representatives, whose responsibility shall be identifying hazards and unsafe work practices, removing obstacles to accident prevention, and helping evaluate the company's effort to achieve an accident and injury free workplace.

Six Safety and Health Principles of our Company

- All injuries and work related illness can be & must be prevented.
- Management is responsible and accountable for safety and health performance.
- Employee engagement and training is essential.
- Working safely is a condition of employment.
- Excellence in safety & health supports excellent business results.
- Safety & health must be integrated in all business management processes.

We are committed to achieving these objectives and targets through:

- Proactively seeking to eliminate unacceptable risks through a systematic risk identification and assessment process that is an integrated part of day to day operations.
- Providing a level of leadership and training to ensure that work is managed to achieve a safe, efficient and productive outcome.
- Gaining the total involvement and commitment of all EML employees to achieving an accident free and healthy workplace.
- The provision of adequate resources and logistics support to ensure the requirements of the Safety measures are implemented.
- Management *Systems* are implemented.
- Comply with all applicable legislation, acts, regulations, codes of practice and standards.
- Internally and externally auditing safety performance in all areas.
- To provide effective injury management and rehabilitation for all employees.
- Ensuring the *Health and Safety Policy* is available to all EML employees, contractors, visitors and interested parties, and that they are informed of and understand their obligations in respect to the policy.

Responsibilities of Head of the Department:

- Effective implementation of *Health & Safety* policy within the factory and area under their control.

HEALTH & SAFETY POLICY

R-Safety-8.2.2-40

- Review the implementation of *Health & Safety* policy periodically and make recommendation for compliance and improvement to the Chairman of the Apex Safety Committee.
- Strive in laying down standard procedures and systems for safe working in the factory.
- Arrange to provide necessary information and instruction to Head of the Section (HOS) and all the employees.
- Involvement and participation of the staff working under their control in the implementation of the *Health & Safety* policy and improvement of working environment.
- Use of all the necessary techniques like safety inspection, safety audits at design stage, commissioning stage, shutdown & breakdown stage and at any modification and facilities.
